

# Ecostick

*The revolution of snowmaking !*

## **NIVIS LANCE „ECOSTICK”**

<b>Nivis Ecostick</b>	
Operating pressure	20 - 80 bar
Water supply	app. 3 – 13 m <sup>3</sup> /h
Snow production	31 m <sup>3</sup> /h
Compressed air supply	unnecessary !
Power consumption	0,0 kW
Ejector number	1 - 3
Weight	90 kg
Height	10 m
Foundation	shaft / earthfoundation
Version	automatic / manual

## THE NIVIS PRINCIPLE

The Nivis snow Lance need neither compressed air, nor own power supply.

The compressor is replaced by specially developed ejectors which suck in air and produce an air-water mixture that is pulverized directly in the nozzle head.

This system, patented by Nivis, uses the compression of water, contributing to **SAVINGS 100% OF COMPRESSOR POWER** compared to all other competitors, **LESS WEIGHT** as well as **REDUCTION NOISE** and **LESS MAINTENANCE**.

The production of artificial snow is identical to that obtained using traditional snow Lances.

## PRODUCT:

**The Nivis snow Lance Ecostick is the revolution of the artificial snow making, it is the worldwide unique snow Lance without consumption of compressed air!**

**Ecostick** is equipped with 1 – 3 patented Nivis ejectors and is available in automatic and manual versions.
